# DEVICE TREATMENTS

## META-THERAPY

Thanks to this spectacular technology, the skin texture and pores are refined, the oval of the face is redrawn, wrinkles and fine lines are diminished, the skin's elasticity is enhanced which results in a visibly younger appearance.

Meta Therapy is a safe, 100% natural anti-aging treatment. It involves making micro perforations in the skin which activate the natural repair process of the skin. In addition, it stimulates and enhances the production of collagen and elastin. As a result, the skin is restored from the inside out through regeneration of the skin tissue. Meta Therapy has a double active function. Besides the micro perforations, active ingredients are placed into the layer of the skin where they can be most active.

Indications: Hyperpigmentation, Acne scars, loss of elasticity and firmness, large pores, dehydrated skin, fine lines and deep wrinkles.

Recommandation: Best results are obtained with a cure. Ideally 8 sessions over 3 months.
